RESOURCE AND PATIENT MANAGEMENT SYSTEM

Release of Information Disclosure System

(BRN)

Technical Manual

Version 2.0 Patch 5
September 2023

Table of Contents

Revision History

This technical manual has been revised according to the following:

Version	Date	Author	Section	Page Number	Summary of Change
	04/10/03	unknown			Last revisions
	02/11/08	TRG			Corrupted Word file re-created and brought into compliance with IHS documentation standards
	02/20/2008	Fels			Updated to match p 1 software
	02/27/08	SM			Minor edits and formatting
	05/08/2023	SS			Converted from PDF to Word, grammar, spelling, formatting and 508 compliance check

Preface

The purpose of this manual is to provide technical information about the Release of Information Disclosure System (ROI). The BRN package is designed to track the following information:

- Requesting party

- Disclosure record status (Open/Closed/Hold)

- Type of disclosure (Personnel, Medical, Record, Other)

- Purpose of the disclosure (Further Medical Care, Insurance, Attorney)

- Personal, school, tort, ROI, subpoena, other)

- Detailed description/additional pertinent information/medical record date range

- Request priority (Non-Critical, Stat)

- Field staff assignment

- Congressional requests

- Receiving parties

1.0 Introduction

This manual provides IHS site managers with a technical description of the Release of Information Disclosure System routines, files, menus, cross references, *globals*, and other necessary information required to effectively manage the system.

All routines, files, options, and keys are name-spaced starting with the letters "BRN". The file number range for this package is 90260-90264.

2.0 Implementation and Maintenance

2.1 General Information

Refer to the Release of Information (BRN) Installation Guide and Release Notes for maintenance and implementation information, specifically where to locate the option in the menus.

2.2 System Requirements

- FileMan V21 or higher

- Kernel V8.0 or higher

- XB Utilities V3.0

2.3 Package-wide Variables

There are no package-wide variables.

2.4 Security Keys

The following table provides details regarding security keys.

Table 2-1: Security Keys

Key Name	Description
BRNZMENU	This is the main menu for the ROI disclosure program The additional manager key is named AZXAZMGR.
BRNZMGR	This is the security key for the manager menu option of the ROI disclosure program.
BRNZDELETE	This is the security key to delete "OPEN" disclosures only.
BRNZEDIT	This is the security key for the ROI data entry option.

4.0　　Routine Descriptions

4.1　　Routine List

Please note the following listed routines.

Table 4-1: Listed Routines

Routine Name	Routine Name	Routine Name	Routine Name	Routine Name	Routine Name
BRN	BRN2ND	BRNACT	BRNADD	BRNADDM	BRNAGE
BRNAGE1	BRNAGE2	BRNCLOS	BRNDEL	BRNDTST	BRNFMC
BRNFMTS	BRNFOIA	BRNKILL	BRNL	BRNLKI1	BRNMLB
BRNMLOG	BRNOPEN	BRNP01	BRNP04	BRNPAGE	BRNPOST
BRNPOST1	BRNPRE	BRNPREI	BRNPTCH2	BRNPTN	BRNPTR
BRNPTRQ	BRNPUR	BRNRD	BRNRD1	BRNRDLT	BRNRDSP
BRNREF	BNREP	BRNRLU	BRNRLUX	BRNRUP2	BRNRUP3
BRNRUS	BRNSERV	BRNSUSPN	BRNU	BRNUSER	

Please note the routines updated in patch 1.

Table 4-2: Routines Updated in Patch 1

Routine Name	Routine Name	Routine Name	Routine Name	Routine Name	Routine Name
BRN	BRN2ND	BRNADD	BRNAGE	BRNAGE1	BRNCLOS
BRNDTST	BRNFOIA	BRNMLOG	BRNPAGE	BRNPTRQ	BRNPUR
BRNRLU	BRNSUSPN	BRNUSER			

Please note the routines added with patch 1.

Table 4-3: Routines Added with Patch 1

Routine Name	Routine Name	Routine Name	Routine Name	Routine Name	Routine Name
BRNADDM	BRNAGE2	BRNMLB	BRNOPEN	BRNP01	BRNRU
BRNRU1	BRNRU11	BRNRU2	BRNRU21	BRNRU3	BRNRUP
BRNRUP1	BRNRUP2	BRNRUP3	BRNRUS	BRNU	

4.2　　Routines with Descriptions

Table 4-4: Routines with Descriptions

Routine	Description
BRN	DISCLOSURE SYSTEM
BRN2ND	ROI
BRNACT	ROI PATIENT ACCOUNTING OF DISCLOSURE REPORT
BRNADD	ADD A NEW DISCLOSURE DATE
BRNADDM	ADD MULTIPLE PATIENTS UNDER ONE REQUEST
BRNAGE	ROI AGING REPORT (BY STATUS
BRNAGE1	ROI AGING REPORT (BY AGE STARTING POINT)
BRNAGE2	ROI AGING REPORT (BY STAFF ASSIGNMENT)
BRNCLOS	ROI CLOSED DISCLOSURES (BY DATE RANGE)
BRNDEL	DISCLOSURE DELETE
BRNDTST	ROI SELECTED REQUEST STATUS AND (BY DATE RANGE)
BRNFMC	DISCLOSURE FILEMAN CALLS
BRNFMTS	DRIVER FOR PRIMARY CARE PROVIDER REPORT
BRNFOIA	ROI FOIA DISCLOSURES BYPURPOSE (BY DATE RANGE)
BRNKILL	KILL ALL BRN VARIABLES
BRNL	List Template Exporter
BRNLKI1	IDENTIFIERS FOR DISCLOSURE LOOKUP 2
BRNMLB	ROI MAILING LABELS
BRNMLOG	ROI MASTER LOG (BY DATE RANGE)
BRNOPEN	LIST OPEN DISCLOSURES
BRNP01	PRE & POST INIT CODE FOR PATCH 1
BRNP04	PRE & POST INIT CODE FOR PATCH 4
BRNPAGE	ROI REPRODUCTION COSTS (BY DATE RANGE)
BRNPOST	Post Init Routine
BRNPOST1	Populate the File Conversion Field
BRNPRE	PREINIT, CHK RQMNTS, ETC., DELETE DICS
BRNPREI	CREATED BY XBBPI ON JAN 20, 2003
BRNPTCH2 BRNPTN	Patch 2 Environment/Post Install ROI CUMMULATIVE PATIENT HX FOR CHART
BRNPTR	PT RECORD
BRNPTRQ	ROI REQUESTING PARTY (BY DATE RANGE)

Routine	Description
BRNPUR	ROI CLOSED DISCLOSURES BY PURPOSE (BY DATE RANGE)
BRNRD	DISCLOSURE DISPLAY
BRNRD1	NO DESCRIPTION PROVIDED
BRNRDLT	REFERRAL DELETE
BRNRDSP	ROI DISPLAY OF DISCLOSURE
BRNREF	SET DISCOSURE VARIABLES
BRNREP	ROI DISCLOSURES PRINT REPORTS BY DATE RANGE AND FACIITY
BRNRLU	ROI GEN RETR UTILITIES
BRNRLUX	ROI GEN RETR UTILITIES
BRNRU	ROI REPORTING UTILITY DRIVER
BRNRU1	REPORTING UTILITY SCREEN LOGIC
BRNRU11	PROCESS VISIT LIST
BRNRU2	REPORTING UTILITY - SCREEN SELECTION
BRNRU21	SCREEN LOGIC CODE BY FIELD TYPE
BRNRU3	MISC REPORT LOGIC
BRNRUP	REPORT UTILITY PRINT LOGIC
BRNRUP1	CONTINED REPORT UTILITY PRINT LOGIC
BRNRUP2	CONTINED REPORT UTILITY PRINT LOGIC
BRNRUP3	CONTINED REPORT UTILITY PRINT LOGIC
BRNRUS	SHOW LOGIC SO FAR
BRNSERV	INQUIRY FOR DISCLOSURE DISPLAY - PT SPECIFIC
BRNSUSPN	ROI SUSPENDED DISCLOSURES (BY DATE RANGE)
BRNU	UTILITY & FUNCTION CALLS
BRNUSER	ROI USER INITAITED WORKLOAD REPORT AND (BY DATE RANGE

Figure 7-1: Menu Option List

8.0　　Internal Relations

Users should be given access to the appropriate options and keys, as needed. All of the options in this system stand alone.

9.0   External Relations

9.1   Callable Routines

There are no entry points callable by other packages.

9.2   External Calls

The following list indicates the external calls made by the system to other RPMS packages:

Table 9-1: External Calls

Routine Called	Invoked By
AUPNPAT	BRNADD+48, BRNPTR+64, BRNRD+17, BRNRLU+22, BRNRLU+23, BRNRLU+24
VADPT	BRNU

9.3   Exported Options

Table 9-2: Exported Options

Option Name	Description
BRN ACCOUNTING OF DISCLOSURES Patient Accounting of Disclosures	Prints a listing of all disclosures for a patient during the specified date range.
BRN DE ADD NEW RECORD Add a New Disclosure Record	Allows adding a new disclosure record for a patient.
BRN DE ADDITIONAL REQUEST Enter Additional Request Receipt Dates (2nd/3rd)	Allows adding up to two additional receipt dates for a request.
BRN DE ADDRESS Enter Patient Address (If different from Pt Reg)	Allows entering of a different patient address into a disclosure record if the address is different from the one recorded in Patient Registration
BRN DE DELETE RECORD Delete Open Disclosure Records	Allows deletion of open disclosure records.
BRN DE DISCLOSURE Enter Disclosure Documentation	Allows adding/editing receiving parties for a disclosure record.
BRN DE EDIT DATE Edit Date Request Initiated	Allows editing of the Date Request Initiated for a disclosure record.

Option Name	Description
BRN DE INPUT ALL DATA Edit Existing Disclosure Record	Allows editing all data for an existing disclosure record.
BRN DE MULTIPLE ADD Add Multiple Patients Under One Request	Allows editing request information when multiple patients fall under that request.
BRN DE STATUS Edit Request Status	Allows editing the Request Status of a disclosure record.
BRN ENTER SUSPEND DATE Enter or Edit Beg/End SUSPEND Dates	Allows entry or editing of suspend start and end dates of a disclosure record.
BRN GS AGING RPT Print AGING REPORTS	Allows printing of the disclosure record aging report sorted by Request STATUS, AGING Range, STAFF Assignment, or PURPOSE.
BRN GS MAST LOG Print Master Log (By Date Range)	Print a listing of all disclosures for the specified date range.
BRN GS PATIENT PATIENT Detail Disclosure Log (Cumulative)	Prints a detailed listing of all disclosures for the specified patient.
BRN GS PATIENT ACCOUNTING PATIENT Detail Disclosure Log (Cummulative)	Prints a listing of all disclosures for a specified patient.
BRN LABELS PRINT Print Mailing Labels	Users can enter multiple disclosure requests so mailing labels for receiving parties with disclosure dates can be printed. If there are multiple receiving parties, the user can select from the listing. Label spacing is the same as address labels in Patient Registration.
BRN MENU DE ROI EDIT MENU	Menu containing options for entering and editing disclosure record information
BRN MENU MGT ROI MANAGEMENT MENU	Menu containing options for managing the package.
BRN MENU RPT ROI REPORTS MENU	Menu containing options for printing various disclosure reports.
BRN MGT CHANGE REQ PARTY Change Spelling of Requesting Party	Allows editing the name of a requesting party entry in the ROI Listing Rec Party file.
BRN MGT INPUT REQ/REC PARTY Enter or Edit Requesting/Receiving Parties	Allows entering of new requesting or receiving party entries into the ROI Listing Rec Party file.

Option Name	Description
BRN MGT INQUIRE Inquire to a Specific Requesting Party	Displays a requesting or receiving party entry in the ROI Listing Rec Party file.
BRN MGT PRINT REQ/REC PARTY Print Listing of all Parties	Prints a listing of all requesting or receiving party entries in the ROI Listing Rec Party file.
BRN PT CUMMULATIVE RECORD Listing Patient Cumulative Disclosures (SUSPEND)	Prints a listing of all disclosures for the specified patient. Suspended disclosures can be included.
BRN PURPOSE SUBTOTAL Count Closed Disclosures By Purpose/Date Range	Prints a count of closed disclosures sorted by purpose for the specified date range.
BRN REPORT UTILITY ROI REPORTING UTILITY	This option is used to build customized Release of Information reports.
BRN RPT 2ND REQUEST Print All Disclosures W/2nd and/or 3rd Requests	Prints a listing of all disclosure records containing 2nd and/or 3rd requests for the specified date range.
BRN RPT DISCLOSURE RECORDS Print CLOSED Disclosure Records	Prints a listing of all closed disclosure records during a specified date range.
BRN RPT INQUIRY Inquire to a Specific ROI Disclosure Record	Displays all data associated with the specified disclosure record.
BRN RPT OPEN STATUS Print OPEN Disclosures Only	Prints a detailed listing of all open disclosures.
BRN RPT PRIORITY REQUEST Priority Request Report (By STATUS)	Prints a listing of disclosures showing Request Priority sorted by Disclosure Status for the specified date range.
BRN RPT RECORD DISSEMINATION Count Records Disseminated by Date	Count closed disclosures by record dissemination, date and facility
BRN RPT REPRODUCTION Print Reproduction Page Costs (By Date Range)	Prints total number of disclosures, total number of pages and total production cost for the specified date range.
BRN RPT REQ METHOD SUBTOTAL Count Records by Request Method	Count Closed Disclosures by Request Method, date and facility

Option Name	Description
BRN RPT REQUESTING PARTY Print Requesting Party Workload by Date Range	Prints Requesting Party Workload report for the specified date range.
BRN RPT SUSPEND Print SUSPEND Disclosures Only (For Date Range)	Prints listing of all suspended disclosures for the specified date range.
BRN RPT USER WORKLOAD Print User Workload by Date Range	Prints listing of all disclosures for the specified date range sorted by User Who INITIATED Request, User Who was ASSIGNED request, or User who CLOSED request.
BRN SITE PARAMETER Enter or Edit Site Parameter	Allows entering or editing the package site parameters.
BRNMENU RELEASE OF INFORMATION SYSTEM	Main Release of Information menu.

9.4 Published Entry Points

None.

10.0   Archiving and Purging

There is no archiving and purging in this package.

11.0   Generating Online Documentation

This section describes some methods to generate Release of Information Disclosure System technical documentation. Online ROI software technical documentation, in addition to that which is located in the help prompts throughout the ROI package, can be generated through the use of several kernel options. These include, but are not limited to, the following:

- Menu management

- Inquire option

- Print option file

- VA FileMan

- Data dictionary utilities

- List file attributes

Typing ? at the "Select . . . Option" prompt will provide online technical information.

- A single question mark (?) lists all options that can be accessed from the current option.

- Two question marks (??) list all options accessible from the current one, showing the formal name and lock for each.

- Three question marks (???) display a brief description for each option in a menu.

- An option name preceded by a question mark (?OPTION) shows extended help, if available, for that option.

For a more exhaustive option listing and further information about other utilities that supply online technical information, consult the DHCP Kernel Reference manual.

11.1   %INDEX

This option analyzes the structure of a routine to determine in part if the routine adheres to RPMS programming standards. The %INDEX output can include the following components:

- Compiled list of errors and warnings

- Routine listing

- Local variables

- Global variables

- Naked globals

- Label references

- External references

Running %INDEX for a specified set of routines, allows users to discover any deviations from RPMS programming standards that exist in the selected routines and to see how routines interact with one another (i.e., which routines call or are called by other routines). To run %INDEX for the ROI package, type the BRN namespace at the Routine(s)?> prompt.

11.2   List File Attributes

This VA FileMan option allows users to generate documentation pertaining to files and file structure. Using the standard format of this option yields the following data dictionary information for a specified file:

- File name and description
- Identifiers
- Cross-references
- Files pointed to by the file specified
- Files that point to the file specified
- Input, print, and sort templates

In addition, the following applicable data is supplied for each field in the file:

- Field name, number, title, and description
- Global location
- Help prompt
- Cross-references
- Input transform
- Date last edited
- Notes

Using the Global Map format of this option generates an output that lists the following information:

- All cross-references for the selected file
- Global location of each field in the file
- Input, print, and sort templates

12.0   SAC Requirements and Exemptions

There are no exemptions to the SAC standards for this version.

Glossary

Archiving

The storing of historical or little-used data off-line (often on tape).

ASUFAC Number

Area Service Unit Facility; A unique identifier for each facility within IHS. A six-digit number comprised of 2 digits for Area, 2 digits for Service Unit, and 2 digits for Facility.

Banner

A line of text with a user's name and domain.

Browser

An interactive application that displays ASCII text on a terminal that supports a scroll region. The text can be in the form of a word-processing field or sequential local or global array. The user is allowed to navigate freely within \the document.

Callable Entry Points

Places in a routine that can be called from an application program.

Cross-reference

An indexing method whereby files can include pre-sorted lists of entries as part of the stored database. Cross-references (x-refs) facilitate look-up and reporting.

Default Facility

A user selects a facility identification to work with patients registered to that facility.

Entry Point

Entry point within a routine that is referenced by a "DO" or "GOTO" command from a routine internal to a package.

File

A set of related records or entries treated as a single unit.

FileMan

The database management system for RPMS.

Global

>In MUMPS, global refers to a variable stored on disk (global variable) or the array to which the global variable may belong (global array).

Health Record Number (HRN)

>Each facility assigns a unique number within that facility to each patient. Each HRN with its facility identification "ASUFAC" make a unique identifier within all of IHS.

INDEX (%INDEX)

>A Kernel utility used to verify routines and other MUMPS code associated with a package. Checking is done according to current ANSI MUMPS standards and RPMS programming standards. This tool can be invoked through an option or from direct mode (>D ^%INDEX).

Init

>Initialization of an application package. The initialization step in the installation process builds files from a set of routines (the init routines). Init is a shortened form of initialization.

Internal Entry Number (IEN)

>The number used to identify an entry within a file. Every record has a unique internal entry number.

IRM

>Information Resource Management. The IHS personnel responsible for information systems management and security.

Kernel

>The set of MUMPS software utilities functioning as an intermediary between the host operating system and application packages, such as Laboratory and Pharmacy. The Kernel provides a standard and consistent user and programmer interface between application packages and the underlying MUMPS implementation. These utilities provide the foundation for RPMS.

Menu

>A list of choices for computing activity. A menu is a type of option designed to identify a series of items (other options) for presentation to the user for selection. When displayed, menu-type options are preceded by the word "Select" and followed by the word "option" as in Select Menu Management option: (the menu's select prompt).

Namespace

>A unique set of 2 to 4 alpha characters that are assigned by the database administrator to a software application.

Official Registering Facility. A facility so designated that when HRNs are added/modified, those changes are sent to the central database. A Service Unit may have several satellites for which it is registering patients.

Option

An entry in the Option file. As an item on a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity. Options may also be scheduled to run in the background, non-interactively, by TaskMan.

Patient Care Component (PCC)

The central repository for data in the Resource and Patient Management System (RPMS).

Queuing

Requesting that a job be processed at a later time rather than within the current session.

Routine

A program or sequence of instructions called by a program that may have some general or frequent use. MUMPS routines are groups of program lines that are saved, loaded, and called as a single unit via a specific name.

UCI

User Class Identification: a computing area.

Up-Hat (^)

A circumflex, also known as a "hat" or "caret," that is used as a piece delimiter in a global. The up hat is denoted as "^" and is typed by pressing Shift+6 on the keyboard.

Utility

A callable routine line tag or function. A universal routine usable by anyone.

Variable

A character or group of characters that refers to a value. MUMPS recognizes three types of variables: local variables, global variables, and special variables. Local variables exist in a partition of the main memory and disappear at sign-off. A global variable is stored on disk, potentially available to any user. Global variables usually exist as parts of global arrays.

Acronym List

Acronym	Term Meaning
ASUFAC	Area Service Unit Facility; A unique identifier for each facility within IHS. A six-digit number comprised of 2 digits for Area, 2 digits for Service Unit, and 2 digits for Facility.
BRN	The namespace of the Release of Information Disclosure System package.
FOIA	Freedom of Information Act
HHS	Department of Health and Human Services
HIPPA	Health Insurance Portability and Accountability Act
HRCN	Patient Health Record Number
HRN	Patient Health Record Number
IEN	Internal Entry Number
IHS	Indian Health Service
IRM	Information Resource Management
ISSO	Information System Security Officer
PCC	Patient Care Component
PGEN	Patient Report Generator
RoB	Rules of Behavior
ROI	Release of Information
RPMS	Resource and Patient Management System
SAC	Standards and Conventions
UCI	User Class Identification
VGEN	Visit Report Generator
VPN	Virtual Private Network
