

Urban Indian Organization (UIO) National Data Reporting	Summary	Data Source	Data Period	Data Type	Who is required to report?
Uniform Data System (UDS)	Is a standardized reporting system that provides an overview of patients and visits at a UIO, including aggregated total number, age, gender, zip code of residence, insurance sources, race/ethnicity of patients, number of visits by provider type, key diagnoses and services, characteristics of special populations, quality of care indicators, health outcomes, and disparities.	National Data Warehouse (NDW) or manual	Calendar Year (1/1 – 12/31)	Quantitative	All 41 UIOs
Budget Formulation (BF)	The report definition is based on unduplicated number of patients and total number of visits (Ambulatory, Telecommunications, and Chart Reviews) by Tribal Membership.	NDW or manual	Calendar Year (1/1 – 12/31)	Quantitative	All 41 UIOs
Government Performance and Results Act (GPRA)/GPRA Modernization Act (GPRAMA)	Includes clinical care performance measures, such as care for patients with diabetes, cancer screening, immunizations, behavioral health screening, and other prevention measures. The agency also reports many non-clinical measures including rates of hospital accreditation, injury prevention, and infrastructure improvements. Integrated Data Collection System (IDCS) is a reporting tool for the clinical measures.	NDW	Fiscal Year (10/1 – 9/30)	Quantitative	All 41 UIOs
National Immunization Reporting System (NIRS) and Outreach/Referral Immunization activities	A facility's immunization coverage on children aged 3-27 months, 2-year-olds, adolescents, adults, an influenza. Data entered through NIRS and/or 4-in-1 grantee quarterly reports are used to develop Area and National level immunization reports.	NIRS web portal 4-in-1 quarterly reports	Fiscal Year (10/1-9/30) Quarterly (4/1 – 3/31)	Quantitative & Qualitative	All 41 UIOs

Active User Population	User population is based on the service unit of residence. See Standard Code Book (SCB) for association of Communities and Service Units. Not all urban Service Units have communities associated with them. If your Service Unit has communities associated with it, they will be included in the denominator of IDCS. If your Service Unit does not have communities, there will not be a user population for use in IDCS denominator	NDW	Sliding 3 year window	Quantitative	If any urban Service Unit has communities associated with it, they are included
1A–Workload reports (Area/Service Unit/Location of Encounter)	Direct outpatient workload visits. Provides a count of Direct Outpatient workload visits. A hyphen in the report indicates low numbers that have been redacted for privacy reasons. The criteria include diagnosis codes, clinics, providers, service categories. Refer to business rules for additional information on the criteria. The reports are emailed on the 28 th of every month.	NDW	Fiscal Year (10/1 – 9/30)	Quantitative	All 41 UIOs

Note: UIOs that participate in any reports outside of UDS, BF, and NIRS are limited to facilities that automatically provision data to NDW.
