- Overall, there is a slight increase in ILI in IHS nationwide, and an increase in several IHS Areas relative to the previous week.
- Modest increases in vaccination coverage continue.
- U.S. general population influenza vaccine coverage estimates for Nov. 2010ⁱ, based on self-report (not medical chart review) are:

6 months – 17 yrs: 30.6% (<u>+</u> 5.0%);

All ages: 32.8% (<u>+</u> 2.4%).

While these estimates are higher than those reported by I/T/U sites through the IIAS, differences in survey methodology may account for some of the difference.
