## Preface

This package examines the Indian Health Service (IHS) Resource and Patient Management System (RPMS) software packages to verify that the version and patch level is at the minimum level required to meet the 2015 Certified Electronic Health Record (EHR) requirements, including the 2015 Edition Cures updates.

## 1.0 Release Notes

The Certified Electronic Record Checker (BCER) Version 8.0 checks for the minimum level of software version and patches needed to meet 2015 Certified EHR requirements, including the 2015 Edition Cures updates.

It includes the following routines:

- BCERECK8
- BCEROPT

### 1.1 Feature Numbers Included in Release

- Feature 93540 - BCER updates for f6 (Anti-Microbial)
- Description: BCER certification updates for f6 (Anti-Microbial)

### 2.2 Required Resources

The following patches needs to be installed prior to installing BCER v8.0:

- Kernel v8.0 p1018 (XU\*8.0\*1018) or later
- FileMan v22.0 p1018 (DI\*22.0\*1018) or later

## 3.0 Installation Instructions

In all namespaces where BCER will be installed:

1. Log in as a system manager and go to programmer mode **D ^XUP** and choose:  
**KERNEL INSTALLATION AND DISTRIBUTION.**
2. Load the KIDS using Option **1** on the **KIDS Installation** menu.
3. Verify the load using Option **2** on the **KIDS Installation** menu.
4. Install the distribution using Option **6**; the **Install Name** is **BCER 8.0**.
  - a. The installation should take less than five minutes.
  - b. The Menu Trees do not need to be rebuilt.
  - c. Logons do not need to be disabled.
  - d. Scheduled Options, Menu Options, or Protocols do not need to be disabled.
  - e. It is strongly recommended that the output not be queued so that the post-install messages display.
  - f. It is recommended that the terminal output during the installation be captured. This will ensure a printed audit trail if any problems should arise. In addition, if any requirements are missing, a list of missing patches and versions is provided during the installation.
