

SEPTEMBER IS PROSTATE CANCER AWARENESS MONTH

PROSTATE CANCER SYMPTOMS

Men have different symptoms for prostate cancer, however most times men do not have symptoms at all.

If you have any of the following symptoms, visit a health care provider:

- Difficulty starting urination.
- Weak or interrupted flow of urine.
- Urinating often, especially at night.
- Trouble emptying the bladder completely.
- Pain or burning during urination.
- Blood in the urine or semen.
- Pain in the back, hips, or pelvis that doesn't go away.
- Painful ejaculation.

Prostate cancer is the second-leading cause of cancer death in men.

If you have any symptoms that worry you, see a health care provider near you.
