

Know About Syphilis

Syphilis spreads skin-to-skin during anal, oral, and vaginal sex.

Pregnant people can pass syphilis to their baby during pregnancy and childbirth.

Syphilis is curable!

Talk with your local health care provider or tribal health facility for more information about testing and treatment options near you.

You **CANNOT** get syphilis through everyday contact with things such as:

Sitting on toilet seats

Coughing or sneezing

Holding hands or hugging

Sharing towels
